

JAGGAER CONTENT BRIEF

Claude for S2P: Watch How It Works — Curated Videos and Original Jaggaer Webinars

TOFU · Geography: ALL · Webinar / Video Page · Cluster spoke (not anchor)

Brief at a glance

URL SLUG	/claude-s2p-webinars-videos (revised from /claude-s2p-watch-how-it-works — the original slug matched none of the primary/secondary keyword terms; this version carries both "webinars" and "videos," the two words actually present in the stakeholder keywords. H1 and framing remain untouched.)
CONTENT TYPE	Webinar / Video Page — S2P Prompt Library & Webinar Hub spoke (per project brief). Second piece in this cluster; the cluster anchor is "The Jaggaer S2P Claude Prompt Library: 20 Fundamental Queries Every Procurement Pro Needs" — link up to it, don't duplicate its list format.
TARGET WORD COUNT	900–1,200 words of on-page framing copy — this is a media/video hub, not a long-form article. Most of the page's value comes from embedded video, not prose, so word count is a byproduct of the intro, section framing, and FAQ — not a target to write toward.
TARGET AUDIENCE	TOFU procurement professionals who've picked up that JAGGAER + Claude does something in S2P but haven't seen it yet. They want to watch it, not read a tutorial. Commercial intent here means they're forming a first impression of credibility, not comparing vendors line by line.
FUNNEL / GEO / PATH	TOFU · Geography: ALL · User Path 1, 2 · Publishing Week 4 (per project card)
PRIMARY KEYWORD	Claude S2P procurement webinar tutorial video — stakeholder-specified, kept exactly as given. No keyword export was supplied for this brief; unlike the other six pieces already built in this pillar, there's no MSV/KD data available at all here (see Section 2). Drives H1/title/framing only.
SECONDARY KEYWORD	AI S2P procurement how-to video guide — stakeholder-specified, kept exactly as given. Same caveat: no keyword data was supplied for this piece.
PILLAR PAGE LINK	Links to and receives a link from the AI in S2P pillar page, and from the cluster anchor ("The Jaggaer S2P Claude Prompt Library"). Also links directly out to JAGGAER's existing on-demand webinar hub — <i>JAGGAER Webinars Learn from Procurement Experts</i> (jaggaer.com/webinars) — see Section 5.
PUBLISH PRIORITY	Medium — a genuine content gap exists (see Section 1), but this piece is production-dependent: it can't publish until real platform demo footage and/or webinar recordings exist to embed. Flag to Content Ops: confirm video asset timeline before committing to Week 4.

1. Search intent analysis

The reader has likely seen written claims about Claude inside JAGGAER's S2P suite — from the prompt library piece, the Contracts cluster, or the Suppliers & Sourcing cluster — and wants proof they can watch instead of read. TOFU and Commercial intent together mean they want a fast, low-effort way to see it work and decide if it's worth exploring further. "Watch how it works" makes that intent explicit — this is a media page, not an article.

What the reader needs to leave with

- A real look at Claude working inside JAGGAER's S2P workflow — not a marketing render or a slide deck.
- Awareness that JAGGAER already runs a broader webinar program (jaggaer.com/webinars), and that this page is the dedicated AI/Claude entry point into it — not a replacement for it.
- A path to go deeper: the prompt library (cluster anchor) and the written tutorials in the other two AI in S2P clusters, once they've decided the topic is worth their time.
- A clear next step: watch a video, register for a webinar, or book a demo.

SERP features to target

- **Featured snippet** — 2–3 sentence framing of what this hub is and what's on it, directly under the H1.
- **People Also Ask** — FAQ section (Section 6) reframed around "is there a demo/video of this" rather than generic AI-in-procurement questions.
- **Video rich results / video carousel** — every embedded video needs VideoObject schema (Section 7) to be eligible for Google's video-specific search features, not just a standard organic listing.

Competitive gap: the Claude-webinar landscape reviewed for this brief — Anthropic's own webinar catalog, and IT-training providers (ONLC, Graduate School USA) running generic "Intro to Claude" sessions — isn't procurement-specific. JAGGAER's own webinar hub (reviewed directly at jaggaer.com/webinars) currently covers tariffs, ESG, and supplier management broadly, not a dedicated AI/Claude angle. Nothing reviewed combines a Claude-specific angle with S2P-specific, vendor-native video in one place — genuine open territory, but one that only works once real footage exists to fill it.

STAKEHOLDER NOTE

Primary/secondary keywords are stakeholder-set, kept exactly as given. Unlike every other piece in this pillar, no keyword export exists for this topic — no MSV/KD pull to draw supporting terms from. Section 2 flags this and gives directional, not volume-validated, terms. Recommend a follow-up keyword pull once approved.

PRODUCTION NOTE — BLOCKING DEPENDENCY

This piece is embed-dependent. Have the writer contact **Jason**, the webinar/video program manager, to source: (a) curated, real JAGGAER platform demo footage of Claude/AI inside an S2P workflow, and (b) any original JAGGAER webinar recordings that already touch AI/Claude in procurement. Do not substitute stock footage, competitor clips, or mocked-up recordings — if no real footage exists yet, flag that to Content Ops rather than working around it.

2. Target keywords

Primary & secondary (topical anchors — kept exactly as specified)

KEYWORD	MSV	KD	INTENT
Claude S2P procurement webinar tutorial video	No export supplied	n/a	Stakeholder-set primary — drives H1/title/framing, unchanged
AI S2P procurement how-to video guide	No export supplied	n/a	Stakeholder-set secondary — kept as-is, unchanged

No keyword export exists for this brief. Every other piece in this pillar (Contracts ×2, Suppliers & Sourcing ×3, Prompt Library ×1) was built against a supplied MSV/KD pull; this is the first piece in the pillar without one. Rather than inventing volume or difficulty figures, the table below lists directionally relevant supporting terms only — chosen for topical fit and natural search phrasing, not validated against a keyword tool.

Supporting keywords — directional only, no MSV/KD data available

KEYWORD	MSV	KD	INTENT
claude for procurement video	No data supplied	No data supplied	Informational — closest natural phrase to "watch Claude used in procurement"
ai in procurement webinar	No data supplied	No data supplied	Informational / Commercial
watch ai in action procurement	No data supplied	No data supplied	Informational
procurement webinar on demand	No data supplied	No data supplied	Informational — ties to JAGGAER's existing on-demand format
jaggaer webinars	No data supplied	No data supplied	Navigational / branded — matches the destination hub this page links to
claude demo procurement software	No data supplied	No data supplied	Commercial

RECOMMENDED BEFORE FINALIZING

Run a dedicated keyword pull on these six phrases, plus "claude procurement webinar," "S2P video tutorial," and "AI procurement demo video." Also worth a parallel check of YouTube search volume/autocomplete for the video-specific phrasing — video content often surfaces through video-carousel and YouTube search behavior rather than standard web search alone, and that signal wouldn't show up in a typical organic keyword tool anyway.

No corrections were made to the stakeholder-supplied primary/secondary keywords — per standing instruction, no additional primary or secondary anchor terms were added beyond the two given. Only the supporting table above was built out, and it is explicitly unvalidated pending real keyword data.

3. Recommended page structure

H1 (Title)	Claude for S2P: Watch How It Works — Curated Videos and Original Jaggaer Webinars (kept exactly as specified)
Meta title	Claude for S2P: Watch How It Works (Videos) — 43 characters
Meta description	Watch how Claude works inside Jaggaer's S2P platform — curated demo videos and original webinars, no reading required. — 118 characters
Intro (100-150 words)	Open with a 2-3 sentence, snippet-ready framing: this is a curated hub of videos and webinars showing Claude working inside JAGGAER's S2P platform, and it's the visual companion to the written prompt library and tutorials elsewhere in this pillar. Work "ai in procurement webinar" naturally into this framing. Keep it short — this is a video-led page, and the intro's job is to get the reader scrolling to a play button, not to read a full article.
H2: Watch Claude Working Inside JAGGAER's S2P Platform	The primary video section. 2-4 short, real platform demo clips (contracts, sourcing/suppliers, RFP generation) sourced from Jason — see the production note in Section 1. Each video gets a 1-2 sentence caption, not a full write-up, so it doesn't duplicate the written tutorials. Work "claude for procurement video" and "watch ai in action procurement" naturally into the framing text. Primary visual goes here (Section 4).
H2: Original Jaggaer Webinars on AI in Procurement	A curated selection of relevant on-demand webinars pulled from jaggaer.com/webinars that touch AI/Claude/S2P themes specifically. Link directly to that page for the full library rather than trying to mirror it. Use "jaggaer webinars" and "procurement webinar on demand" naturally here.
H2: What to Watch First	A short, opinionated "start here" grouping — one video for someone curious about contracts, one for sourcing/suppliers, one for the broad "what is this" overview. Work "claude demo procurement software" naturally into this framing. Helps a TOFU reader self-select instead of scrolling everything. Secondary visual (video index table) goes here (Section 4).
H2: Read the Full Walkthroughs	Bridge from video to the written clusters: the prompt library (cluster anchor), and both other AI in S2P clusters (Contracts; Suppliers & Sourcing). This is the "go deeper" section — no new information here.
H2: FAQ	8 short questions — see Section 6. 2-3 sentences each, self-contained.
H2: Next steps	Link to the pillar page, jaggaer.com/webinars, and a demo/trial CTA (Section 5). No new information here.

4. Visual production notes

Primary visual

Actual embedded video player(s) — this is the content of the page, not a supporting graphic. Requires curated JAGGAER platform demo footage and/or original webinar recordings, sourced from Jason (see Section 1). Appears within the first two scrolls, directly under H2: Watch Claude Working Inside JAGGAER's S2P Platform.

Secondary visual

A simple 3-column video index table — title / format (platform demo, webinar recording, etc.) / what it covers (contracts, sourcing, overview). Appears under H2: What to Watch First, so a scanning reader can pick one without watching all of them.

DO NOT SUBSTITUTE

Do not embed or link to competitor demo videos or third-party "Claude 101" webinars (e.g. ONLC, Graduate School USA) reviewed during this brief's research — they're useful only for confirming the competitive gap, never for linking out. This brief cannot finalize a firm video count or runtime until Jason confirms what real footage is available; flag that as an open item for Content Ops rather than guessing a number here.

Every embedded video needs a real thumbnail, an accurate duration, and an accessible transcript or captions — this covers accessibility and also feeds the VideoObject schema in Section 7.

5. Internal linking plan

Pillar page — AI in S2P	"AI in Source-to-Pay" · Intro / Next steps
Cluster anchor — "The Jaggaer S2P Claude Prompt Library"	"the full prompt library" · Read the Full Walkthroughs
Spoke — "Stop Manually Hunting for Risky Clauses..."	"the contract risk-review walkthrough" · Read the Full Walkthroughs
Spoke — "How to Use Claude to Find Alternative Suppliers..."	"the alternative-suppliers walkthrough" · Read the Full Walkthroughs
External — JAGGAER Webinars (jaggaer.com/webinars)	"JAGGAER's full on-demand webinar library" · Original Jaggaer Webinars section + Next steps
Product / CTA — Book a Demo	"book a live demo" · Next steps

This is the only piece in the pillar that links externally to a live JAGGAER.com page (jaggaer.com/webinars) rather than only to internal cluster content — confirm the link target and anchor text against the live page before publish, since webinar listings there rotate.

6. FAQ targets

- Is there a video showing Claude actually working inside JAGGAER?
- What's the difference between this page and JAGGAER's main webinar library?
- Do I need to register to watch these videos?
- Are these live webinars or on-demand recordings?
- Where can I find written, step-by-step instructions instead of a video?
- How often is this video library updated?
- Can I request a live walkthrough instead of watching a recording?
- Does JAGGAER run regular webinars specifically about AI or Claude?

7. SEO and technical requirements

URL	/claude-s2p-webinars-videos (no date — evergreen; revised from /claude-s2p-watch-how-it-works to carry the "webinars"/"videos" keyword terms — see Brief at a glance)
Title tag	Claude for S2P: Watch How It Works (Videos) — 43 characters
Meta description	Watch how Claude works inside Jaggaer's S2P platform — curated demo videos and original webinars, no reading required. — 118 characters
Schema markup	VideoObject schema on every embedded video (name, description, thumbnailUrl, uploadDate, duration in ISO 8601, and contentUrl/embedUrl); WebPage or Article schema for the page shell; FAQPage schema on the FAQ section (Section 6) — this page still earns PAA/FAQ rich-result eligibility the same as every other piece in this pillar, video content doesn't replace that. Consider a video sitemap entry if the CMS supports one — video-specific indexing benefits from it beyond standard schema alone.
Update cadence	Review whenever a new relevant JAGGAER webinar publishes, or when new platform demo footage becomes available. Treat this as a living hub, not a one-time publish.
Canonical	Self-canonical. No date variants.
Disclaimer	Not required — no legal/compliance content on this page. Remove per template default unless product marketing flags a specific capability claim inside a video that needs one.

8. Recommended sources

- JAGGAER's existing on-demand webinar library — *JAGGAER Webinars | Learn from Procurement Experts* (<https://www.jaggaer.com/webinars>) — source for any webinars to curate/link, and the destination for "see the full library."
- **Jason**, webinar/video program manager (internal) — required contact for sourcing actual platform demo footage and original webinar recordings before this page can be built. Flag as a blocking dependency, not a nice-to-have.
- JAGGAER's own product documentation for Claude/AI capabilities across Contracts, Sourcing, and Supplier Intelligence (internal) — for caption accuracy on any embedded demo.

Source note: the general Claude-webinar landscape (Anthropic's own webinar catalog, and third-party IT-training providers running generic "Intro to Claude" sessions) was reviewed only to confirm the competitive gap — none of it should be linked, embedded, or cited in the published piece. This brief has no keyword export to date (see Section 2). This document is not legal advice.
